The U.S. Department of Energy (DOE) is currently conducting the fifth five-year review at the Fernald Preserve, as required by Section 121 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended by the Superfund Amendments and Reauthorization Act of 1986 (SARA). CERCLA requires a five-year review for remedial actions that result in any hazardous substances, pollutants, or contaminants remaining on-site at levels that do not allow for unlimited use and unrestricted exposure. The purpose of the five-year review is to ensure that the remedies implemented to clean up the site continue to be protective of human health and the environment.

Community and regulatory involvement is an integral part of the Fernald Preserve mission and the CERCLA five-year review process. DOE values and requests any input or comments you have regarding the site's activities since stakeholder feedback was collected for the last CERCLA five-year review in 2015. Completed questionnaires will be accepted through November 13, 2020.
